DETAILED ACTION

1. Claims 1-13 are presented for examination.

Information Disclosure Statement

2. The Information Disclosure Statement filed on February 23, 2005 has been considered.

Drawings

3. Figures 1 and 2 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Specification

4. This application does not contain an abstract of the disclosure as required by 37 CFR 1.72(b). An abstract on a separate sheet is required.

Claim Objections

5. Claim 8 is objected to because of the following informalities: "forma" is unclear. Appropriate correction is required.

Claim Rejections - 35 USC § 102

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

7. Claims 1-4 are rejected under 35 U.S.C. 102(e) as being anticipated by Chainer et al (USPN 6,603,627), hereafter as Chainer.

RE claim 1, Chainer discloses an information pattern for determination of a transverse position from compound phase measurements of signals obtained from a sensor that scans a surface in a particular "track" direction (see column 3 lines 8-23, 49-52).

RE claim 2, Chainer discloses that the pattern comprises bursts having various rates of change of phase as the transverse position is changed (see figure 2).

RE claims 3 and 4, Chainer discloses that the phases of various bursts are combined mathematically to enhance the resolution or to provide absolute position information (see figure 2 and column 3 lines 8-23).

Allowable Subject Matter

8. Claims 5-13 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
